

**BHASKARACHARYA NATIONAL INSTITUTE FOR SPACE
APPLICATIONS AND GEO-INFORMATICS**

WEEKLY PROGRESS REPORT (16/03/2026 – 22/03/2026)

WEEK 15

PROJECT NAME

DIGITAL TOWN PLATFORM

PROJECT DESCRIPTION :

**DESIGN TO PROVIDE TOWN-LEVEL
INFORMATION, SERVICES, THROUGH A SINGLE
SYSTEM**

GROUP MEMBER :

Vandit Muniya, Mitanshu Parmar

GROUP ID :

2025G152

GROUP GUIDE :

Dr. MANOJ PANDYA

GROUP COORDINATOR :

SIDHDHARTH PATEL

COLLEGE GUIDE NAME :

NEHA FOTEDAR

COLLEGE GUIDE No. :

NOT ASSIGNED

COLLEGE GUIDE EMAIL. :

Nehafotedar.ce@ddu.ac.in

COLLEGE NAME :

DHARMSINH DESAI UNIVERSITY, NADIAD

16/03/2026	• Vandit Muniya: Studied and explored shortest path algorithms for route-based features in the platform, analyzed graph-based data representation for map services, and evaluated how routing logic can be integrated with existing geospatial modules. • Mitanshu Parmar: Researched backend implementation strategies for shortest path computation, explored suitable data structures for graph storage, and reviewed approaches for efficient pathfinding in large datasets.
17/03/2026	• Vandit Muniya: Absent. • Mitanshu Parmar: Began Redis integration to improve backend performance, explored caching mechanisms for frequently accessed data, and tested basic Redis operations for storing and retrieving key-value data.
18/03/2026	• Vandit Muniya: Absent. • Mitanshu Parmar: Continued working with Redis, implemented caching for repeated backend queries, and analyzed performance improvements in API response time using cached results.
19/03/2026	• Holiday (Gudi padwa)
20/03/2026	• Vandit Muniya: Reviewed shortest path implementation approach and discussed how routing results can be connected with frontend map visualization for better user navigation features. • Mitanshu Parmar: Debugged Redis integration issues, refined caching logic, and ensured proper handling of dynamic data with cache updates.
21/03/2026	• Holiday (Eid)
22/03/2026	Holiday (Sunday)

Next Week Plan

- Perform integration testing between Marketplace, Services, and dataset modules
- Improve accuracy of location-based recommendations
